A Better Version of Tomorrow

AI, agents and the alternative funds value chain

CYPRUS FUNDS SUMMIT · LIMASSOL · 16 NOVEMBER 2026

Everyone in asset management is talking about AI.

Almost all of it is about AI inside the company.

Chat answers. Agents act.

CHAT AI

You ask a question & it answers

AGENTIC AI

You give it a goal, it tries things and can interact with other systems

Resolve

Oversight no longer needs to sample.

TODAY

Sample.

- A sample of what third parties have done
- Wide tolerances
- Some things too hard to replicate
- Reviewed periodically
- Documents read by hand, or re-keyed

WITH AI

Full fidelity.

- Every transaction
- Narrow tolerances
- Replicates everything
- Real time
- Every LPA, side letter and notice read

Resolve

Selection: search, gatekeepers and questionnaires.

01

Manager search becomes radically more competitive.

02

Consultants' gatekeeping power weakens.

03

RFPs and DDQs look extremely vulnerable.

Resolve

Distribution: the allocator might be an app.

01

The app becomes the allocator.

Revolut’s app sells private markets funds from Apollo, Ares, Hamilton Lane and Partners Group, from €1. It has its own AI assistant.

02

It knows the customer, and starts young.

It sees balance and spending. Its CEO describes the old bank plan: win customers young and keep them.

03

It hired a host manager.

Revolut Ventures, an ELTIF due in 2027: Carne as fund manager, Revolut as delegated investment manager.

Resolve

Brand name weakens.

An agent will look at a Cyprus manager with:

- €500m of assets under management
- Excellent performance
- A strong, stable team
- Poor consultant penetration

THE CONDITION

Provided that the manager's data is available to the agent.

If its data is hidden in PDFs, it is still invisible.

Resolve

What an agent says says about you

We sent an agent to all 43 Cyprus AIFMs.

CYSEC'S REGISTER

31 had real content

3 look empty to a simple agent

3 "coming soon" or a password

6 unreachable at CySEC's address

9 of 43

show nothing, even to a real browser

THE 31 SITES WITH CONTENT

Fund names	26 of 31
Fund size	6 of 31
Firm AUM	4 of 31
Fees	4 of 31
Fund LEI or ISIN	4 of 31

For 18 of the 31, GLEIF lists their fund LEIs. Their own websites don't show them.

Resolve

Then we asked ChatGPT, Gemini and Perplexity.

15 of 15

answers named a Cyprus manager.

3 of 31

fund mentions came with a size.

0 of 3

reported a US$366m NAV that a manager publishes on its own page.

WHERE THE ANSWERS CAME FROM

CySEC’s register · the Bank of Spain · the Central Bank of Cyprus · a 2023 news profile · an old directory · **and your website, when it said things plainly**

Resolve

Say it plainly, or someone else will say it for you.

01

“AIFM Hosting”

One firm’s group website uses it as a heading. **All three assistants recommended it first.**

02

“€95bn+” and “€1bn+”

Two numbers on one homepage. Two assistants reported AUM **95 times apart.**

03

Licence renounced

One assistant recommended a host AIFM that gave up its licence, **from an old directory.**

If you do not describe yourself, the agent uses whatever it finds.

Resolve

The register makes you findable. Your data makes you investable.

CYPRUS COMPETES ON SPEED

~1 month

to register a RAIF, against 6+ months for an authorised AIF

€11.2bn

under management, end-2025; private equity the largest strategy

WHAT AN AGENT CAN READ

On your own pages, in plain text:

What you do, in your client's words

Legal name and LEI of every fund

Strategy, size, and the date of the figure

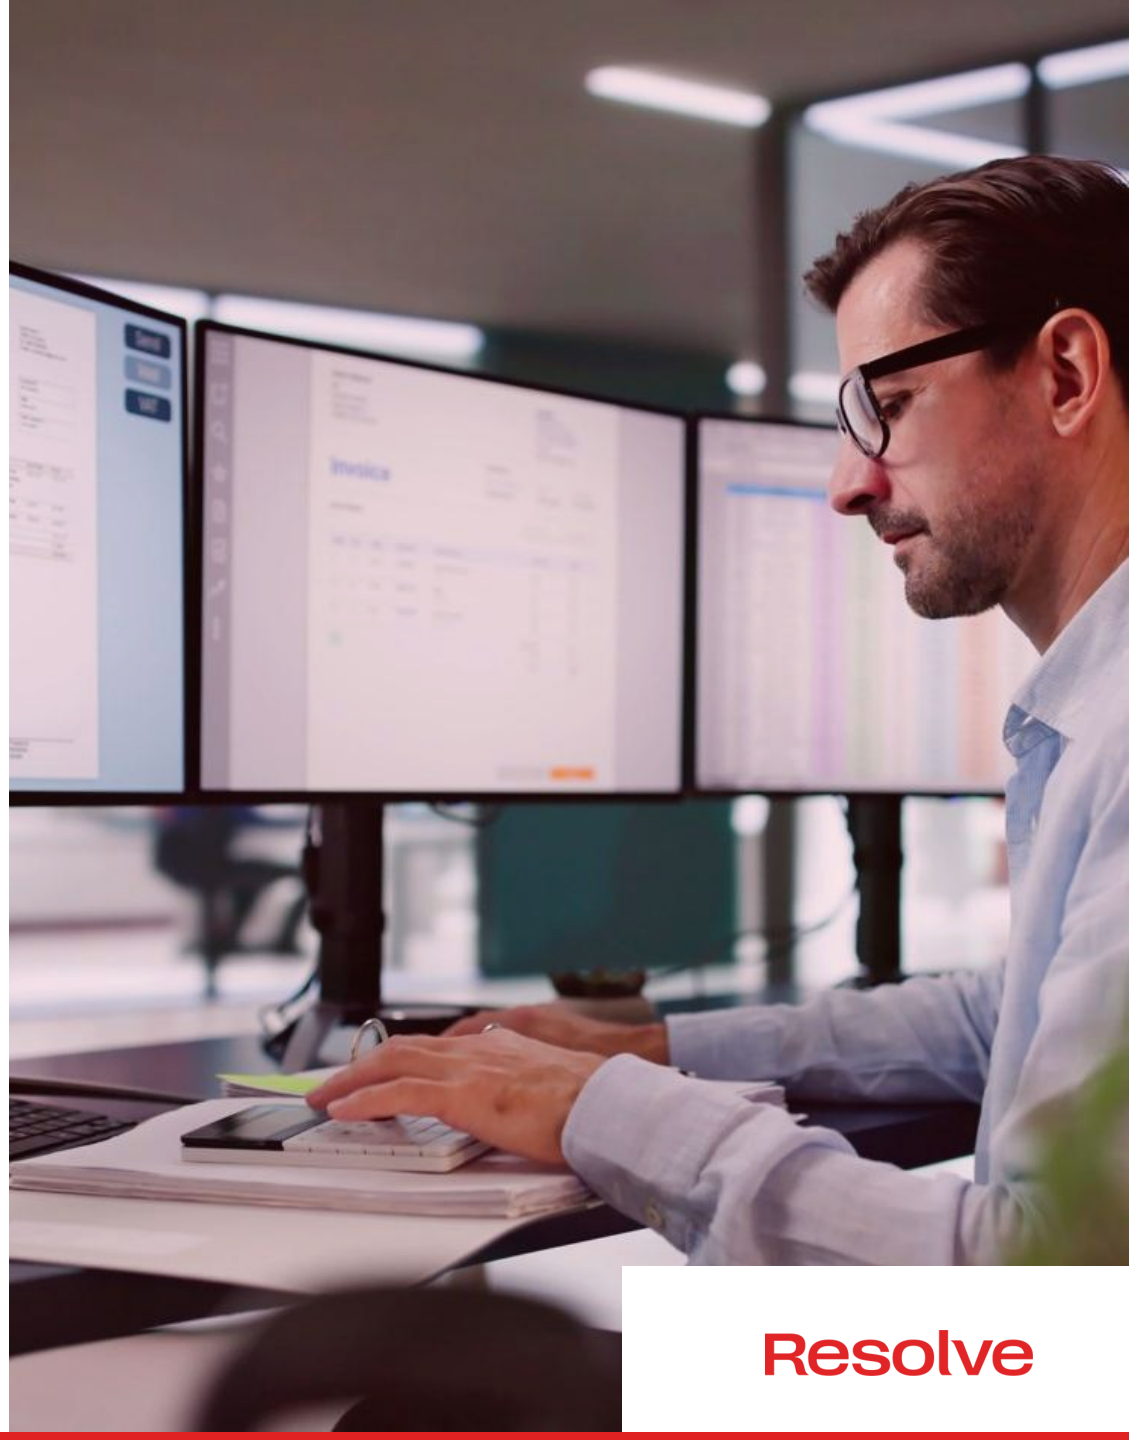

Minimum investment and who is eligible

Then a gated route for verified investors' agents.

Resolve

RESOLVE'S GOAL

Make an asset manager institutionally agent-ready.

Resolve

A faster version of yesterday is a dangerous place to be

if your competitor is building tomorrow.

Resolve

Thank you.

BRIAN WALSH

CEO, Resolve
